About me

I'm a Computer Science graduate with immense curiosity and taste for Design, reason why I decided to take a Master's in Design in Multimedia.

At the moment, I am looking to learn and expand my horizons within both areas and gain skills that will be valuable in my professional future, as well as apply and make use of everything I have learned so far.

My main interest is Front-End/Web Development, but I'm also open to know more about other opportunities!

Education

Master's in Design and Multimedia
University of Coimbra

2020 — July 2022 (expected)

Classes on Web Development, Interaction Design, Interface Technologies, Mobile Development, and so on.
